

Is Fluoride harmful? Is Fluoride medicine?

Come along to hear international experts and decide for yourself.

Professor Paul Connett has spoken and given more than 2,000 presentations in forty-nine states and fifty-two countries. He holds a bachelor's degree from the University of Cambridge and a Ph.D. in chemistry from Dartmouth College and is a retired professor of environmental chemistry and toxicology at St. Lawrence University.

Dr William Hirzy is a former Senior Vice-President of the Union for the US Environmental Protection Agency (EPA). He has a Ph.D. in chemistry from the University of Missouri. He has been involved in environmental and human health risk assessment for 36 years, in the chemical industry, then at EPA HQ as senior risk assessment scientist.

Wednesday 25th Feb 7pm–9pm.

Great Lake Centre, Story Place, Taupo

Please arrive early, space is limited.

Donation at the door.
